

“Excellent results - I look 10-15 years younger after facelift!”

Facelift: Worth it

Facelift satisfaction: Excellent

I recommend my Facelift provider: L. Mike Nayak, MD

Why: I made a mistake with the first plastic surgeon not understanding the terminology. Do your homework. Look up every word and understand what that medical word and procedure means. Talk to other patients who have had the procedures done you are inquiring about. Hire a surgeon who specializes in your procedures. Do not go to someone who does breast to operate on your face! You will understand why I highly recommend my doctor after you see my before and after pictures. It had been my dream to have a facelift shortly after our youngest was born. I was 40 years old and was hurt by the offhand remarks of people who assumed my son was my grandson!

In October 2006, I had a botched job of a blepharoplasty and endotine transbleph forehead lift from a local surgeon in a different office, one that I would never recommend and he is still practicing. I was expecting my upper and lower eyelids done and the lines in my forehead removed. That is not what I got. You can tell from my before pictures I had wasted my money. My husband told me I looked worse after the surgery.

If you need an electrician, don't hire a plumber. I found a facial plastic surgeon. He is a specialist, and only works on the face.

On September 15, 2009, This wonderful doctor and his assistant performed a lower face lift, submentoplasty, upper eyelid revision and endoscopic brow lift and I am 100% delighted with the results. So is my husband! No one thinks my son is my grandson know! Today I am 55 years old woman and I look like me 10-15 years ago. I highly recommend this skilled surgeon and his office staff to everyone. I well know this is a huge decision, and one that is a huge financial sacrifice you and your family are willing to make. I am happy to share my story and answer any questions you may have to help you decide what is best for you. You want what I want, to be happy with the way we look for years to come.

“I look like I could be my daughter!”

“I had very loose jowls and neck skin. It is gone!”

“These photos were taken after 5 weeks, I look and feel great!”
